

Samir Munir Farhat

Software Engineer | Junior Penetration Tester | SSPTP Certified
samirmunir.f@gmail.com | +971 50 994 2489 | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software Engineering graduate with hands-on experience building full-stack web systems, automation tools, and AI-powered applications, from requirements and system design through development. Experienced in designing multi-tenant platforms and managing company websites. Brings a security-first mindset to every project through Secure SDLC and threat modelling, backed by 4+ years of hands-on experience in cybersecurity, including penetration testing, vulnerability assessment, and security operations. Experienced in conducting network, web application, and system-level penetration tests, performing OSINT reconnaissance, and turning findings into clear, actionable reports. Strong foundation in threat detection, incident response, identity and access management, and endpoint security. Currently preparing for the OSCP certification.

PROFESSIONAL EXPERIENCE

Software Engineer & Technical Lead
Aug 2026 – Present

Al Sindian Group · Sharjah, UAE

- **Technical Leadership:** Sole technical lead responsible for delivering the company's technology projects end to end, from requirements and system design to development.
- **AI Call Center for Restaurants:** Building a multi-tenant AI phone agent for restaurants that handles menu questions, orders, and reservations through tool calling.
- **Law Firm Management Platform:** Building a bilingual, multi-tenant SaaS platform with a RAG-based AI legal assistant that summarizes cases and retrieves current legal provisions from official sources.
- **Web Management:** Redesigned and manage the Texas Gateway Construction website, and administer the Al Sindian Group website.

IT Security Support Engineer
Apr 2026 – Jul 2026

Boutiqaat · Dubai, UAE

- **Identity & Access Management:** Administered user accounts, permissions, and role-based access controls (RBAC) across corporate systems, ensuring least-privilege principles.
- **Endpoint Security:** Deployed, configured, and maintained endpoint protection solutions; enforced security policies across all company devices.
- **Network Security & Troubleshooting:** Monitored and maintained network infrastructure, diagnosed connectivity issues, and supported firewall and VPN configurations.
- **System Hardening:** Applied secure configuration baselines and hardening guidelines across workstations and servers.
- **Security Awareness:** Provided technical guidance and security best-practice training to employees to reduce human-based risk vectors.
- **Incident Response Support:** Assisted in identifying, investigating, and resolving security incidents and anomalous system behavior.

IT & System Engineer
Sep 2025 – Apr 2026

Green Eagle · Dubai, UAE

- Designed, developed, and maintained internal web systems and dashboards with secure access control (RBAC) and data validation to ensure data integrity.
- Integrated internal systems with Zoho CRM while applying security controls to protect sensitive client and investor data.
- Provided technical support and system performance optimization for internal staff.

Information Security Engineer
Jun 2024 – Jun 2025

Syriatel Mobile Telecommunications · Syria

- Monitored and investigated security events using Microsoft Sentinel SIEM, IDS, and IPS technologies to support threat detection and incident response.
- Conducted vulnerability assessments and penetration testing across corporate and government systems, identifying and mitigating critical security risks.
- Performed web application security assessments based on OWASP Top 10, covering SQLi, XSS, CSRF, and authentication vulnerabilities.
- Applied threat modelling during system design phases to identify attack vectors and trust boundaries.
- Enforced Secure SDLC practices in collaboration with development teams throughout the software lifecycle.
- Applied system hardening and secure configuration across enterprise systems and Oracle databases.
- Delivered cybersecurity awareness training and guidance to technical and non-technical staff.

Penetration Tester — CTF & Lab Research
2021 – Present

TryHackMe / HackTheBox · Remote

- Completed the Junior Pentesting Path and advanced labs covering Linux, Web, and Active Directory environments.
- Practiced Kerberoasting, privilege escalation, lateral movement, and post-exploitation in isolated lab environments.
- Active CTF competitor developing practical offensive security skills across diverse challenge categories.

Cybersecurity Instructor & Mentor
2024 – Present

Self-Employed · Remote

- Mentored junior professionals in penetration testing fundamentals and offensive security methodologies.
- Delivered practical training sessions covering OSINT techniques, network scanning, and web application security.

CERTIFICATIONS

- **Secstien Security Penetration Testing Professional (SSPTP)** — Secstien Security LLC *Apr 2026*
- **Certified Ethical Hacker (CEH)** — New Horizon *2022*
- **Microsoft Cybersecurity Tools and Techniques** — Coursera / Microsoft *2022*
- **Information Security Diploma** — Secstien Security *2023*

Currently Preparing: OSCP (Offensive Security Certified Professional) — Expected: December 2026

TECHNICAL SKILLS

Programming Languages: Python, JavaScript (React.js), Java, C#, Bash
Software Development: FastAPI, .NET Framework, Full-Stack Web Development, Multi-Tenant Architecture, Secure SDLC
Databases: PostgreSQL, Oracle DB, MySQL, MongoDB — Administration, Security, High Availability
Penetration Testing: Network, Web Application, System-Level, Active Directory, API Security
OSINT & Reconnaissance: theHarvester, Sherlock, Maltego, Recon-ng, Holehe, Maigret, SpiderFoot
Exploitation Frameworks: Metasploit, Burp Suite, Nmap, Wireshark, Custom Exploit Development
Security Monitoring: Microsoft Sentinel (SIEM), IDS/IPS, Log Analysis, Alert Triage, Incident Response
Web Security: OWASP Top 10, SQLi, XSS, CSRF, API Security, Secure SDLC, Threat Modelling
IAM & Endpoint Security: RBAC, AAA, Endpoint Protection, System Hardening, VPN & Firewall Configuration
Operating Systems: Kali Linux (Advanced), Ubuntu, Windows Server, Windows 10/11

EDUCATION

Bachelor's in Software & Information Systems Engineering
2019 – 2024

Syrian Private University (SPU) · Damascus, Syria

NOTABLE PROJECTS

- **AI Call Center for Restaurants (In Development)** — Multi-tenant AI phone agent that answers restaurant calls and completes tasks end to end through tool calling: searching each restaurant's menu, placing orders, and handling reservations. Designed with role-based access per restaurant and call-capacity isolation between clients.
- **Law Firm Management Platform with AI Legal Assistant (In Development)** — Bilingual (Arabic/English), multi-tenant SaaS for case and client management. The AI assistant summarizes cases from lawyer-provided material and retrieves the relevant, current legal provisions from official government sources (RAG). Led requirements and wrote the SRS.
- **AI Agent for SME Business Management** — Intelligent automation tool for small and medium enterprises.

- **LinkedIn Auto-Apply Bot** — Automated job application tool built with Python and FastAPI, eliminating manual work.
- **Online Clothing Store (UAE)** — Full-stack e-commerce platform with secure payment and inventory management.
- **Pharmaceutical Warehouse Management System** — End-to-end inventory and operations management solution.
- **Ice Cream Product Management System** — Full lifecycle product management platform.

COMMUNITY & MEMBERSHIPS

- Organizing Member — ARC (Annual Robotic Competition), Damascus, April 2024
- Organizing Member — ACM Competition, Syrian Private University, April 2024

LANGUAGES

Arabic: Native **English:** Fluent (Professional Working Proficiency)
